Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Objections

2. Claim 1 is objected to because of the following informalities: for the sake of clarity, in lines 3, 4, and 11, "whitening filter" should be changed to "whitening filter system." Also, in line 5, "parallel whitening filters" should be changed to "parallel individual whitening filters." Appropriate correction is required.
3. Claim 8 is objected to because of the following informalities: for the sake of clarity, in line 6, "whitening filter comprising" should be changed to "whitening filter system comprising". Also, "parallel whitening filters" in line 6 should be changed to parallel individual whitening filters". Also, on page 20, line 4, "whitening filter" should be changed to "whitening filter system". Appropriate correction is required.
4. Claim 14 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 14 is dependent from claim 7, which contains the exact same limitation as claim 14.

5. Claim 15 is objected to because of the following informalities: for the sake of clarity, in lines 5 and 16, "whitening filter" should be changed to "whitening filter system." Also, in line 6, "said whitening filter" should be changed to "said whitening filter system", and "parallel whitening filters" should be changed to "parallel individual whitening filters." Also, in line 15, "parallel whitening filters" should be changed to "parallel individual whitening filters." Appropriate correction is required.

6. Claim 16 is objected to because of the following informalities: the text in parentheses in line 2 will not be considered as part of the claim. If it is meant to be part of the claim, the parentheses need to be deleted. Appropriate correction is required.

Allowable Subject Matter

7. The following is a statement of reasons for the indication of allowable subject matter. In claim 1, the limitation:

...said whitening filter comprising $N_s N_{rx}$ parallel whitening filters with individual whitening filters W_{jk} , receiving, during each symbol interval I , $N_s N_{rx}$ new signal samples via a signal connection matrix such that a first individual whitening filter receives one of the new samples, a second individual whitening filter receives the same new sample as the first individual whitening filter, and one additional new sample, and such that an n th individual whitening filter receives the same $a-1$ new samples as the first $n-1$ individual whitening filters, plus one additional new sample...

is not present in the prior art.

8. The following is a statement of reasons for the indication of allowable subject matter. In claim 8, the limitation:

...where whitening uses, a whitening filter comprising $NsNrx$ parallel whitening filters $w(j,k)$, individual whitening filters $w(j,k)$ receiving during each symbol interval i , $NsNrx$ new signal samples via a signal connection matrix such that a first individual whitening filter receives only one of the new samples, a second individual whitening filter receives the same sample as the first individual whitening filter, and one additional sample, and such that an n th individual whitening filter receives the same $n-1$ samples as the first $n-1$ individual whitening filters, plus one of the remaining samples...

is not present in the prior art.

9. The following is a statement of reasons for the indication of allowable subject matter. In claim 15, the limitation:

...said whitening filter comprising $NsNrx$ parallel whitening filters $w(j,k)$, individual whitening filters $w(j,k)$ receiving, during each symbol interval i , $NsNrx$ new signal samples via a signal connection matrix such that a first individual whitening filter receives one of the new samples, a second individual whitening filter receives the same new sample as the first individual whitening filter, and one additional new sample, and such that an n th individual whitening filter receives the same $n-1$ new samples as the first $n-1$ individual whitening filters, plus one additional new sample...

is not present in the prior art.
